### Kelair secures Kral with exclusive Australian and New Zealand distribution

Kelair Pumps Australia Pty Ltd recently added the complete range of Kral triple-screw pumps to its comprehensive range of positive displacement pumps. With the ability to handle the many positive displacement pump applications throughout different industries and select from its world-leading pump range, Kelair is able to provide a higher level of technical support and after-sales service than most other pump companies.

Kräutler (Kral) GmbH & Co is a manufacturer of high quality displacement pumps and flow meters for liquids. Its manufacturing facility and head office is in Lustenau, Austria, near Lake Constance. The company operates internationally and 90% of its products are exported.

The first screw spindle pumps were built in 1962. From 1982 Kral's range of displacement pumps were inaugurated, followed by flow meter production. These products have been proven over many years of service for their quality and reliability. Kral provides a wide range of pumps with feeding capacities of up to 2200 l/min and feeding pressures of up to 100 bar.

Series	N	K	M	CK	CL	CG
Delivery	420	1500	420	1300	1300	2200
Pressure (bar)	6	16	40	70	100	100
Temperature (°C)	-40 to 130	-40 to 150	-40 to 180	-40 to 80	-40 to 150	-40 to 180
Viscosity*	5000	3000	7000	5000	5000	7000

\*Consult factory for other values. Please ask for the individual product brochures for further details.
